

Kodiak Connected Applications

Kodiak Group Manager – Group Management via the Web, Mobile Internet and SMS

The Kodiak Group Manager application allows users to conveniently create and manage groups using the Web, Mobile Internet, and SMS interfaces. Once groups are created, users can easily call, conference or send voice and text messages, at just the touch of a button. Kodiak Group Manager assigns a telephone number to a group name, so that when a user wants to conference or send a group text or voice message, they only need to select one number to reach the group.

FEATURE OVERVIEW

- Users can create and manage groups via Web, Mobile Internet and SMS interfaces
- Kodiak Group Manager assigns a telephone number to a group of individuals, which can be used for conferencing or sending voice and text messages
- Once a group number is assigned, all group members can also enter the assigned telephone number into their contact list, making it convenient to stay in touch

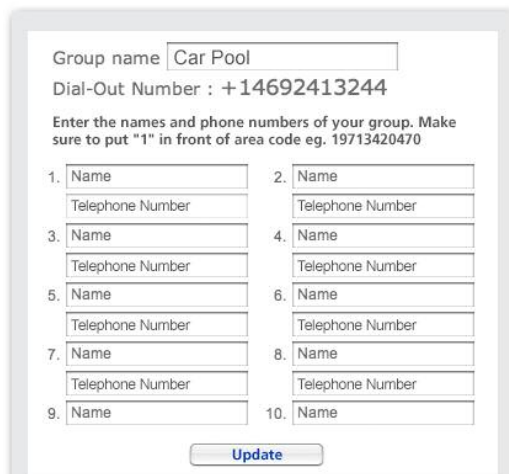

Kodiak Connected Applications

Communicate with any dialable number, on any network – Mobile, Landline or VoIP device

Both client-based and clientless application versions are available

Uses native phonebook for contact and group lists

Kodiak Connected Applications are integrated to maximize end user efficiency and ease of use

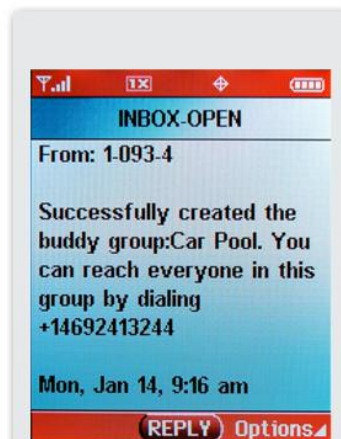

Group name

Dial-Out Number : +14692413244

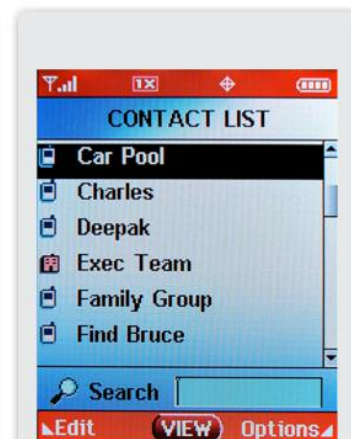

Enter the names and phone numbers of your group. Make sure to put "1" in front of area code eg. 19713420470

1. Name	2. Name
Telephone Number	Telephone Number

9. Name	10. Name

Group Registration
Subscriber registers the phone numbers of the group members and group name (Car Pool)

SMS Notification
SMS notification upon creation of the group Car Pool and its unique phone number

Saving a Group
Subscriber has successfully saved the group "Car Pool" on the handset

THE KODIAK CONNECTED DIFFERENCE FOR END USERS

Convenient – Users can create and manage groups via three intuitive graphical user interfaces.

Simple – A telephone number is assigned to the group for easy, one-touch group conferencing and messaging.

Efficient – Group members can also add the assigned telephone number into their contact list to initiate a mobile conference or send group voice and text messages.

Device Independent – Kodiak Group Manager can include any dialable phone number, on any network, as part of the group list

THE KODIAK CONNECTED DIFFERENCE FOR WIRELESS OPERATORS

Clientless and Client-Based Options – Kodiak Group Manager is available in both clientless and client-based user interfaces, helping to ease group creation and management.

Integrated Applications – Kodiak Group Manager seamlessly integrates with other applications, allowing users to choose how and when they want to communicate with members of their contact list.

Mobile Phone Book – Kodiak Group Manager is a convenient contact and group management interface that simplifies the addressing, organization, and identification of call participants and voice and text message recipients.

Multi-lingual Support – Kodiak Connected Applications can support multi-lingual requirement to address global and regional market demands.
