Kodiak Connected Portfolio

Kodiak Connected Portfolio

Kodiak Networks provides wireless operators with a comprehensive mobile solutions portfolio that is proven to increase revenue, promote group-based communications, and improve customer loyalty and retention. Kodiak enables CDMA, GSM and UMTS carriers around the world to offer innovative mobile voice services via the Kodiak Connected Portfolio.

The Kodiak Connected Portfolio is comprised of mobile solutions targeted at business and consumer segments; an integrated mobile applications suite; and client-based and clientless user interfaces for Open OS and embedded devices. The Portfolio components are based on the Kodiak Real-Time Exchange™ (RTX), a flexible, standards-based, multi-generational IMS-compliant platform, which easily scales from independent operators to multinational carriers utilizing 2G or 3G wireless networks.

Kodiak Connected Solutions

Kodiak Connected Solutions help wireless operators target specific market segments with a streamlined set of mobile applications and client offerings from the Kodiak Connected Portfolio:

- Comprehensive mobile solutions targeted towards business and consumer segments
- Integrated suite of group-oriented mobile applications
- Extensive offering of client-based and clientless user interfaces for Open OS and embedded devices
- Based on a flexible, standards-based, multi-generational IMS-compliant platform

Kodiak Connected Applications

Conferencing

Mobile conference any dialable number – landline, mobile or VoIP device

Messaging

Convenient voice and text-based messaging to individuals and groups

Presence and Contact Management

Real-time presence updates and network stored contacts

Push to Talk

Instant calling with individuals and groups at the press of a button

CONFERENCING

Kodiak Mobile Conference – Provides immediate dial-out mobile conferencing, including one-touch mobile call origination from the contact list. Business colleagues, consumers and social networking groups can instantly join a conference call from any combination of wireless, wireline or VoIP phones.

Kodiak Scheduled Conference – Allows users to schedule conference calls directly from their mobile handset. Convenient auto dial-out and auto-SMS reminders are sent to attendees at the conference start time. Participants can join or rejoin the conference with a single click and are instantly auto-authenticated without personal identification numbers (PIN). All participants can see who is on the conference call. Users can also schedule conference calls from the Web and save to Microsoft Outlook.

Kodiak Meet-me Conference – Provides users with dial-in conferencing that is optimized for the mobile environment. Call participants can join a conference from any phone and on any network. Users also have the option of pay-per-use, without having the service pre-provisioned.

MESSAGING

Kodiak Visual Voice SMS – Allows instant voice messaging to handset-based wireless contact and group lists. Customers can easily retrieve and replay messages via Kodiak Visual Voice SMS, and reply to originator or reply to all recipients directly from the message.

Kodiak Group SMS – Provides users with a convenient way to send a single text message to a group, simultaneously. Group text messages can be sent to any handset, on any wireless network. Message recipients, using any handset can easily reply to the message originator or reply to all recipients, directly from the text message.

PRESENCE AND CONTACT MANAGEMENT

Kodiak Group Manager - Provides end users with the ability to create group lists using a carrier-hosted Web page or their phone's mobile Internet or SMS interface. All group members can save the group name on their handset to initiate mobile conference calls or send group voice or text messages.

Kodiak Quick Reach - Enables the call originator to set-up a contact profile consisting of multiple phone numbers for the same person and to ring these numbers simultaneously; once a phone answers, the other lines immediately drop.

Kodiak PTT Presence Manager – Indicates real-time user availability to receive wireless calls. Presence states include “available,” “do not disturb,” “offline” and “silent mode/ringer off.” This user-driven feature decreases “telephone tag” and ensures privacy when a recipient is in a meeting or away for the day.

Kodiak PTT Contact Manager – Subscribers can instantly create, modify and delete individual contacts, groups, and group members, directly on their handset or through a web interface. Contact information is saved on the operator network, and can be easily restored in the event of a new, lost or stolen handset.

PUSH TO TALK

Kodiak Push to Talk (PTT) – Enables instant calling with individuals and groups at a press of a button. Leveraging the coverage and quality of service (QoS) already available on existing wireless voice networks, Kodiak PTT calls have the fastest combined call set-up time and lowest voice latency in the industry.

Kodiak Voice Notes – Allows users to leave instant voicemail messages from Kodiak-enabled phones to contacts/groups with wireless or wireline phones. Wireless users are able to record their message and have it immediately deposited into a contact or group member's network voicemail box without having to wait for voicemail greetings or ringing the recipient's phone.

Kodiak User Interfaces

Kodiak Networks offers wireless operators an extensive choice of user interfaces to meet different demographic and end user requirements. Kodiak User Interfaces include both client-based and clientless offerings that are supported on a variety of Open OS and embedded devices.

Kodiak User Interfaces include Kodiak Connected Clients, Kodiak Connected Clientless and Kodiak PTT Clients. These user interfaces span a broad suite of mobile applications including Conferencing, Messaging, Presence and Contact Management, and Push to Talk.

Kodiak Connected Client Features

Multilingual Support – The Kodiak Connected Portfolio includes a number of new Open OS clients which are available in multilingual versions to address global market demand.

OTA Download/Pre-Load – The client interfaces can be conveniently downloaded over the air (OTA) to most existing handsets and pre-loaded on new and future devices.

Any Dialable Number – Each Open OS client reads the native phonebook, supports calls to any dialable number, provides call history data, and enables users to create contact lists directly on the handset.

Extensive Client Options – The new Open OS client offerings are based on operator preference for a broad choice of end user device options and include BREW, Java, SIM, Symbian and Windows Mobile.

Kodiak Connected Clientless Features

Market Addressability – Allows wireless operators to immediately deploy innovative, revenue-generating mobile services that address 100% of their customer base.

Native Phone Functionality – Leverages existing native phone functionality including SMS, contact management and call history.

Group Management – Provides the ability to create groups using the wireless carrier Web site or the end user's mobile phone Internet or SMS interface. The groups created can be saved as contacts on the mobile handset.

Kodiak Connected Applications – Consists of innovative wireless applications including Kodiak Mobile Conference, Kodiak Scheduled Conference, Kodiak Meet-me Conference, Kodiak Visual Voice SMS, Kodiak Group SMS, Kodiak Group Manager, and Kodiak Quick Reach.

Kodiak PTT Client Features

Push to Talk Calling – Kodiak PTT callers can make instant calls to individual contacts and groups at the touch of a button.

Quick Groups – Users can make group calls to a pre-determined group of individuals or utilize the Quick Group features to create one-time, 'ad-hoc' groups.

Voice Notes – Allows users to leave instant voicemail messages from Kodiak PTT-enabled phones to contacts/groups with wireless or wireline phones.

Call Me Alerts – Subscribers can send an on-screen "Call me alert" to another PTT user to request an instant or mobile voice conversation.

Convert to Cellular – Once a PTT session is established, the originator can convert an instant group call to a full-duplex conference call.

Call Waiting – The Call Waiting feature is also supported with PTT, so users are notified of incoming calls and able to accept, decline or swap calls.

“Voice will continue to
pay the bills for a long time.”

Andrew M. Seybold,
Andrew Seybold, Inc.

Kodiak Real Time Exchange™

The Kodiak Real Time Exchange (RTX) is a flexible, multigenerational IMS platform, which can easily scale from independent operators to multinational carriers utilizing 2G or 3G wireless networks. Extensively deployed across GSM/UMTS and CDMA networks worldwide, the Kodiak RTX Platform serves as the foundation for the Kodiak Connected Portfolio of integrated solutions, applications, and client interfaces.

The Kodiak RTX Platform adheres to the Open Mobile Alliance (OMA) and IP Multimedia Subsystem (IMS) standards and has a proven industry reputation for superior voice quality, inter-carrier roaming, and ability to bridge voice and packet networks. With its built-in modularity and scalability, the Kodiak RTX provides a cost-effective, software upgrade path to OMA PoCv2 and IMS standard architectures while ensuring maximum protection of operator investment.

The Kodiak RTX creates a unique opportunity for operators to realize new and innovative mobile applications today – while establishing a foundation for profitable future services as standards are completed and 3G networks are launched.

“Voice services still generate nearly 90 percent of wireless operator revenue worldwide.”

Thomas Seitz,
Lehman Brothers

About Kodiak Networks

Kodiak Networks continues to lead the wireless industry with a variety of integrated and innovative mobile applications including Conferencing, Messaging, Presence and Contact Management, and Push to Talk (PTT). The company's customers span the globe and include deployments in North America, Caribbean and Latin America (CALA), Europe, India, and Asia/Pacific.

Headquartered in the United States, Kodiak Networks has employees in locations around the world, including the United States, Europe, India, Southeast Asia and China.
