

## Kodiak Connected Applications

### Kodiak PTT Contact Manager – Device-Based Contact Management

Kodiak PTT Contact Manager provides users with an integrated PTT contact and group management capability, accessed directly on their handset. The Kodiak PTT Contact Manager is permission-based, allowing users to control which contact lists and groups they join. Once a subscriber joins a group, their contact information is automatically shared with other group members. With the Kodiak PTT Contact Manager, users also have the option to manage their contacts via a web interface, which is then downloaded to the device upon the next log-in. All PTT phonebook contact information is saved and stored on the operator network, and can be easily restored in the event of a new, lost or stolen handset.

#### FEATURE OVERVIEW

- Comprehensive PTT contact and group lists via a PTT phonebook
- Kodiak PTT Contact Manager is permission-based, allowing subscribers to control which PTT contact or group list they would like to join
- Contacts are managed via the handset client or web interface
- PTT phonebook information is auto-saved and stored on the operator network

#### THE KODIAK CONNECTED DIFFERENCE

**Handset-Based** – Users can create, modify and delete individual contacts, groups, and group members, directly on the handset

**Permission-Based** – Subscribers control which individuals and/or groups are allowed to see their availability status and/or allowed to contact them via a PTT call

**Automatic Contact Sharing** – Contact information is automatically sent between subscriber devices to eliminate the need to enter multiple or redundant contact list entries

#### Kodiak Connected Applications

Users can easily and instantly update and display their mobile presence status to other Kodiak PTT subscribers

Subscribers navigate Kodiak PTT-enabled mobile applications through a common and simple graphical user interface.

Instantly create, modify and delete individual contacts, groups, and group members, directly on the handset.

Contact information is permission-based and able to be shared between Kodiak PTT subscribers.

Contact information is permanently saved on the operator network and easily restored in the event of a new, lost or stolen handset.

**Web Access to Contacts** – Contacts and groups can be managed via a web interface. Changes are downloaded to the handset when the mobile phone logs into the network

**Network Back-Up and Restore of Contacts** – PTT phonebook contact information is permanently saved on the operator network, and easily restored in the event of a new, lost or stolen handset

**Community Building Applications** – Kodiak PTT Contact Manager, in addition Kodiak Push to Talk and Kodiak Voice Notes, enables instant, community-oriented voice communications for business, family and social networking groups, increasing subscriber loyalty and retention for wireless operators.
