

Kodiak Connected Applications

Kodiak Quick Reach – One Number Dialing for Hard to Reach Individuals

The Kodiak Quick Reach application provides mobile users with a fast and direct method to reach important individuals – without dialing multiple phone numbers. Kodiak Quick Reach enables a call originator to set up a web-based contact profile consisting of multiple phone numbers for the same person (i.e., work, cell, home). A mobile user would select the profile name in their phone contact list to ring these telephone numbers simultaneously. Once the first phone is answered by the person they are trying to reach, the other phone lines immediately drop.

FEATURE OVERVIEW

- Immediately contact hard-to-reach individuals
- Dial just one number to ring multiple phones
- Convenient web-based contact profile
- Contact profile can include work, home, and cell phone numbers – up to 10 numbers can be included

Creating a Contact Profile

Group Name

Enter the names and telephone numbers for the person you are trying to reach.

1. <input type="text" value="Mobile"/>	2. <input type="text" value="Work"/>
<input type="text" value="987 654 3210"/>	<input type="text" value="987 546 0210"/>
3. <input type="text" value="Home"/>	4. <input type="text" value="Name"/>
<input type="text" value="987 454 2265"/>	<input type="text" value="Telephone Number"/>
5. <input type="text" value="Name"/>	6. <input type="text" value="Name"/>
<input type="text" value="Telephone Number"/>	<input type="text" value="Telephone Number"/>
