

Kodiak Connected Applications

Kodiak Voice Notes® – Instant Voice Mail

The Kodiak Voice Notes application allows mobile users to send instant voicemail messages to both wireless and wireline phones by selecting individuals or groups from their PTT phonebook. Users simply select who they want to send a Voice Note to, record their message, and press send. Their message is immediately deposited into the contact or group member's voicemail box without waiting for voicemail greetings or ringing the recipient's phone. Kodiak Voice Notes enables users to conveniently and discreetly send one message to an individual or group of people, at the same time.

FEATURE OVERVIEW

- Deposit instant voicemail messages without ringing the recipient's phone
- Leverages existing operator voicemail systems
- Simple and convenient menu driven interface
- Kodiak Voice Notes application launches directly from the contact list – no need to remember phone numbers or access a separate application
- Send one message to individuals or groups – at the same time

THE KODIAK CONNECTED DIFFERENCE FOR END USERS

Time-Saving – Record one message and send to one person or a group of people

Efficient – Launch application directly from the phone's contact list to easily select message recipients – without having to remember phone numbers

Flexible and Discreet – Users can send Kodiak Voice Notes at any time of day – without ringing the recipient's phone

Convenient – Kodiak Voice Notes recipients receive a prompt message notification through their handset's standard voicemail icon

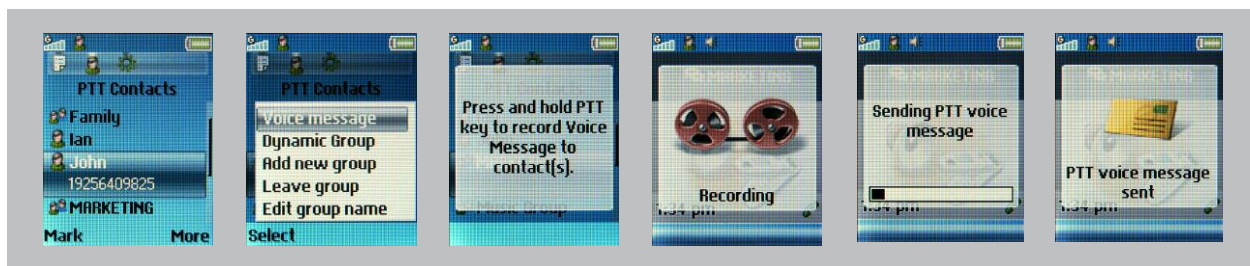

Kodiak Connected Applications

Subscribers navigate Kodiak PTT-enabled mobile applications through a common and simple graphical user interface.

Subscribers instantly create, modify and delete individual contacts, groups, and group members, directly on their handset.

Contact information is permission-based and able to be shared between Kodiak PTT subscribers.

Contact information is permanently saved on the operator's network and is easily restored in the event of a new, lost or stolen handset.

THE KODIAK CONNECTED DIFFERENCE FOR WIRELESS OPERATORS

Increased Revenue and Margins – Enhances the voice messaging functionality of Kodiak PTT, helping to drive additional usage within the PTT application community and improve customer retention.

No Additional Voice Mail Box Needed – Leverages the same voice mail infrastructure and retrieval sequences as the existing voice mail system, saving money for the operator while maintaining familiar user experience for subscribers.

Operator-Configurable Announcements – Through the Kodiak RTX platform, the operator can maintain standard announcements to inform or prompt the Kodiak Voice Notes subscriber during the deposit or retrieval process.

Integrated Application – Voice Notes is seamlessly integrated with the Kodiak PTT application, allowing users to choose how and when they want to communicate with members of their contact list.

Handset-based Contact and Group List Management – Kodiak Voice Notes leverages the same convenient Kodiak contact and group management interface as other Kodiak applications, including PTT.
